

WORKSHOP

Reducing water pollution from pharmaceuticals

13 Dec 2019
Zaragoza, Spain

Michael Wiedemann,
Bayer AG, Corp. HSE
Inter-Association PIE Task Force;
Pillar Lead “**Manufacturing
Effluent Management**”
michael.wiedemann@bayer.com

Summary

- **Eco-Pharmaco-Stewardship (EPS)** is the industry-proposed approach to provide a framework of environmental stewardship for pharmaceuticals covering the life-span of a pharmaceutical product
- **EPS** effectively responds to environmental concerns around PIE, e.g. as expressed in the EU COM PIE Strategy, **without hindering access to medicines for patients.**

Eco-Pharmaco-Stewardship (EPS): A life-cycle approach

Objective: Provide knowledge and data to enable science-based assessments of the environmental sustainability of pharmaceuticals
