

# Policy, Science, Accounting and Business Interface: Reflections + “Take-home messages”

- ▶ What are the **key enabling conditions** for ecosystem accounting?
- ▶ How do we move from experimental applications to “**mainstreaming**”?
- ▶ How to deal with **uncertainty** of results?
- ▶ Deriving **indicators** - and which ones?
- ▶ How to support, sustain and/or strengthen the **dialogue between the disciplines** (using synergies etc.)?
- ▶ How to **communicate** (valuation) outcomes?
