# Zaragoza, 25 years working on water efficiency: Lessons learnt in the climate change context

Climate change and the European water dimension Enhancing resilience

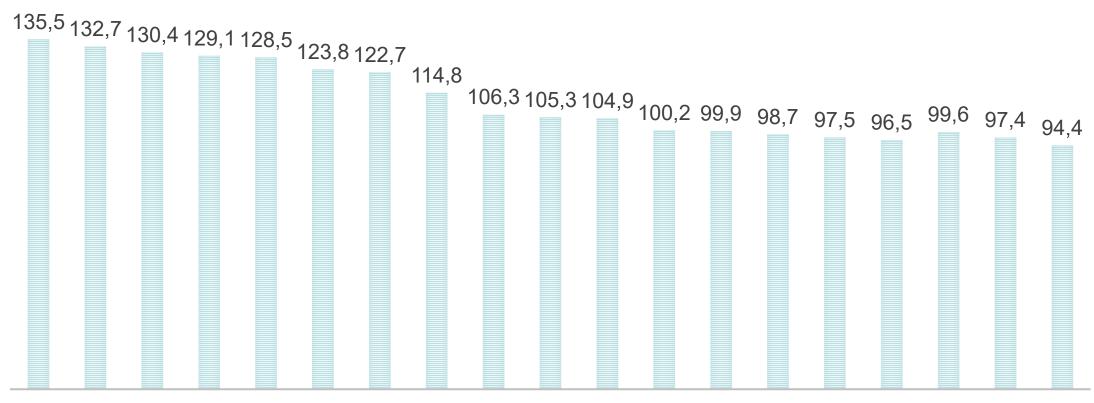

4th of November of 2020

ZINNAE Cluster for the efficient use of water

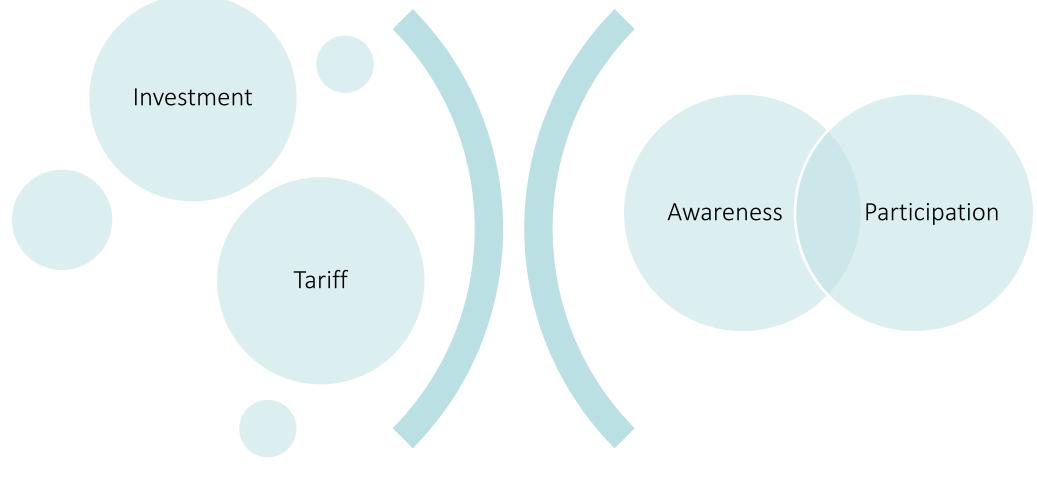

#### Zaragoza water consumption per capita

2000 2001 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016 2017 2018

## 2 factors of success

Money

• Quality improvement and water management plan (2002-2010)

Reduction of the consumption of water from the city to 65 hm3/year Distribution network: 192 km renewed Investment € 104 M.

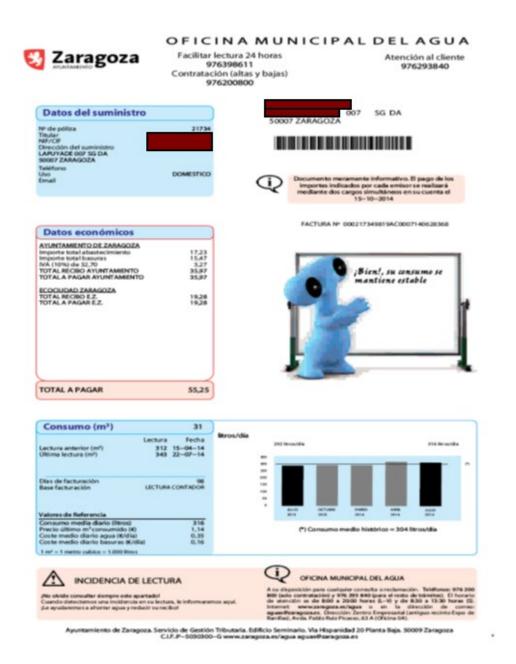

Year	Hm <sup>3</sup> /year
1990	87,12
2001	79,69
2005	68,19
2009	59,9
2014	58,81
2019	58,65

## Tariff

 Bill for Municipal Bylaw on eco-efficiency and quality in integrated water management

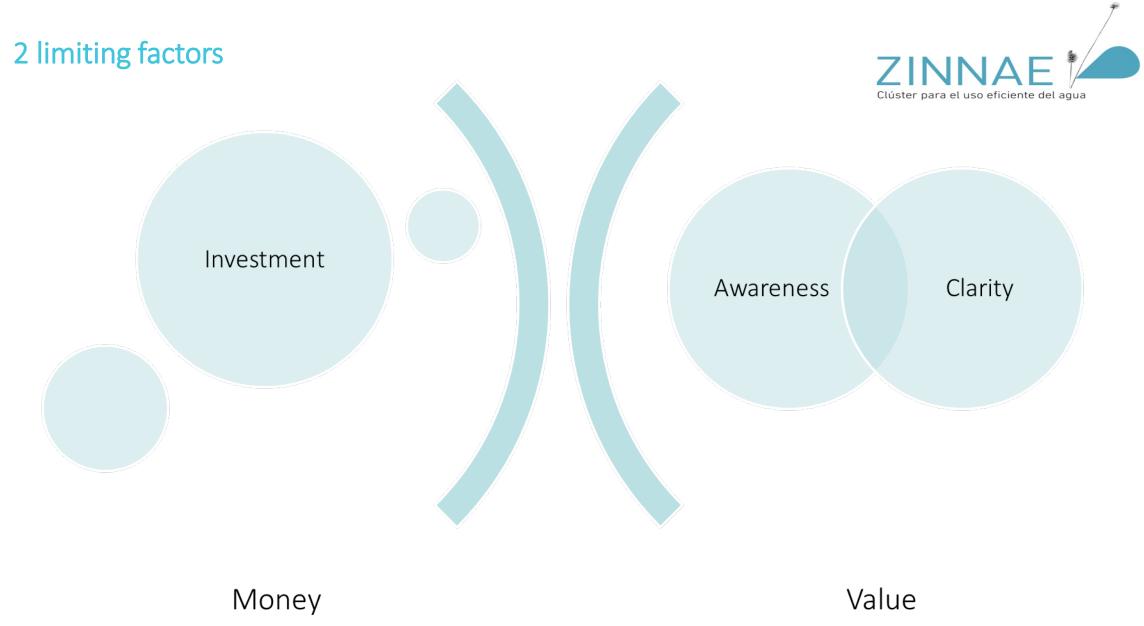

Incentivising rates: progressive bands that award savings

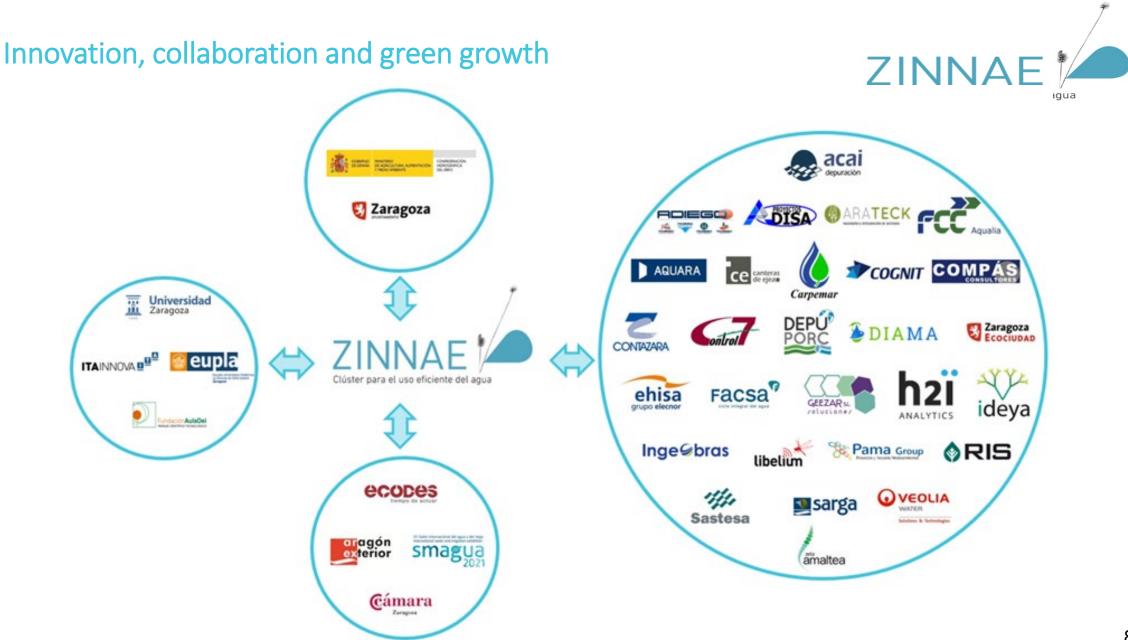

## Awareness and stakeholder participation

#### Water: key factor in the economic and social recovery COVID 19

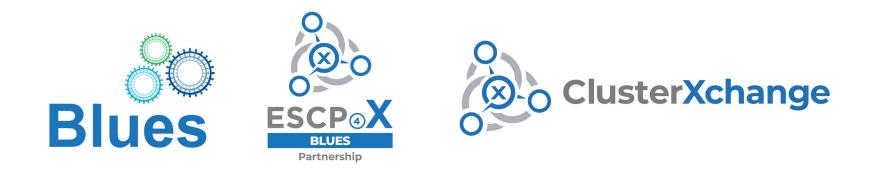

Environmental benefits

Local employment and economic growth

Investment in water infrastructures and projects
